LinkedIn, Portfolio

Full-stack developer and 2026 IT graduate (Summa Cum Laude) with professional experience building web applications, AI-integrated systems, and business process automations. At The Back Room Offshoring Inc. I build internal tools and GERI, a SaaS AI accounting assistant now in beta for overseas (NZ, AU, UK) accounting clients, working across React, Node.js/Express, and PostgreSQL with RAG, third-party API integrations, and n8n workflow automation on Google Cloud Platform and Docker.

Core Competencies

- **Frontend**: React, Next.js, Angular, JavaScript/TypeScript; responsive, component-driven web UIs.
- **Backend**: Node.js, Express, PostgreSQL; REST APIs and data-backed web apps.
- **AI Integration**: Large Language Models (LLM), Retrieval-Augmented Generation (RAG); AI-assisted internal tooling.
- **Automation**: n8n workflow automation, third-party integrations (Xero, Microsoft Teams, Outlook), Zapier migration.
- **Cloud & DevOps**: Google Cloud Platform, Docker; self-hosting and deployment of internal services.

Professional Experience

- **The Back Room Offshoring Inc.** — **Angeles City, Philippines**
  AI-Integrated Web Developer — *Sep 2025 – Present*
  - Developed GERI, a SaaS AI accounting assistant (currently in beta) that automates first-pass reviews for standard accounting engagements, serving overseas accounting clients in NZ, AU, and the UK.
  - Built an internal web app with a RAG chatbot over company documents, policies, and FAQs, plus an eNPS survey with a two-way feedback loop for employees and HR.
  - Lead developer in the 2026 internal hackathon on a Finance web app for consolidating and preparing working papers (P&L, Balance Sheet, Intercompany Reconciliation), reducing manual prep time.
  - Built n8n automations integrating Xero and routing notifications to Microsoft Teams and Outlook.

- **The Back Room Offshoring Inc.** — **Angeles City, Philippines**
  AI / Web Developer Intern — *Jun 2025 – Sep 2025*
  - Pioneered self-hosting of n8n with a fellow intern, moving it from a local server to Google Cloud Platform.
  - Migrated 100+ automations from Zapier to n8n alongside teammates.

Projects

- **Backend – capstone, construction-company client**
  ARISE HRIS
  Full-stack Human Resource Information System: employee records and 201-file handling, leave management, performance evaluations, audit logs, and HR analytics. React, Node.js/Express, PostgreSQL (Supabase), Tailwind, GCP. Live | Code.

- **Backend – school project**
  InternStreet
  Platform connecting Philippine students with company internships: applicant apply flow (resume and cover letter) plus a full admin dashboard with CRUD over users, applications, and jobs, activity logs, and analytics charts. React, Node.js/Express, PostgreSQL. Live | Code.

- **Backend – proposed to a public high school**
  MNHS LMS
  Learning Management System: student dashboard (subjects and module viewing) and admin controls for user management and module upload/update/delete. Node.js/Express, PostgreSQL. Built and demoed as a proposal. Live | Code.
- **Backend – school project, café client**
  Caution Coffee
  Website for a café and supply store: Firebase Authentication, shopping cart, and a customer reviews page. EJS, Node.js/Express, Firebase. Live | Code.

Education

- **Holy Angel University** — **Angeles City, Philippines**
  BS Information Technology, specialization in Web Development — *2022-2026*
  Summa Cum Laude. Conferred April 2026.

Languages

- Filipino (native), English (fluent).

Certifications

- Google Analytics 4 (Skillshop, 2025); Introduction to Networks and Cybersecurity Essentials (Cisco Networking Academy, 2024).
- LinkedIn Learning: React Testing and Debugging, Learning Docker.
